

Water Boost 1.0 Conventional and 2.0 H-UV/H-UV L (LED)

K-Supply

K-Supply Water Boost 1.0 Conventional and K-Supply Water Boost 2.0 H-UV/H-UV L (LED) are water additives especially developed for the washing system to further enhance the cleaning accuracy and guarantee an even water distribution. The K-Supply Water Boost is released for the following combinations:

K-Supply Water Boost 1.0 for PREPAC Conventional 1701

- For blanket and normal/ rough surface impression

K-Supply Water Boost 2.0 for PREPAC Advanced UV 1782

- For H-UV/H-UV L (LED).
- For blanket and normal/ rough surface impression

The K-Supply Water Boost is tested at and approved by the Komori Graphic Center-Europe.

Benefits

- Counteracts deposits of calcium carbonate
- Prevent algae and fungi
- Better removal of paper line ridge
- Corrosion inhibiting
- Less paper waste
- Reduce surface tension water: less drips
- ISEGA Certificate for Water Boost 2.0 and 1782 (food approval)
- Some customers show 10 – 15% savings in wash time and paper waste

Directions

It is recommended to add exactly 5 % of K-Supply Water Boost to the wash water. Komori recommends reverse osmosis water with 8 – 10 °dH (1,42 – 1,78 mmol/l). Distilled water can be used as well, but cleaning effect will be a little less.

Directions for Use:

For details, please refer to the safety data sheet.

Specifications

Product name	K-Supply Water Boost 1.0 Conventional and 2.0 H-UV/H-UV L (LED)
At Solid content (%)	100 Wt %
Solvent content	• Organic solvents 0 Wt % • Water 0 Wt %
Packaging	25 Kg Can
