

K-Blanket Serrata

K-Supply

The K-Blanket Serrata is a sustainable, robust and unique combi blanket, perfectly in line with the latest printing requirements for H-UV/H-UV L (LED), UV and conventional presses. The K-Blanket Serrata is produced using the most advanced production techniques and represents the next generating in blanket manufacturing. Its overall consistency and quality give a superior result.

The K-Blanket Serrata leads to a faster recovery on press, an improved smash resistance and reduced gauge loss. The compressible layer production is completely solvent free. The exceptional long life, improved production time and reduced down-time on press, makes this blanket a great addition to press rooms everywhere and is perfect for paper and carton board applications.

Benefits

- A superb balance between ink transfer and sheet release.
- Consistent dot gain.
- Solid reproduction.
- Excellent blanket for large format applications, because of very low gauge loss and uniform compressibility.
- Fast recovery and the best stability, required for high speed printing.
- K-Blankets Serrata are suitable for both H-UV/H-UV L (LED), UV and conventional press types.
- The K-Blanket Serrata has been tested and approved by the Komori Graphic Center-Europe.

Specifications

Product name	K-Blanket Serrata
Rubber compound	For H-UV/H-UV L (LED), UV and conventional systems.
Surface finish	Buffed
Compressibility indentation	Medium at 0.20 mm
Roughness (Ra)	1.1 µm
Colour	Blue
Nominal thickness	1.95 mm
Thickness range	1.93 - 1.98 mm
Overall hardness (Shore A)	80°
Elongation at 10 N/mm)	< 1.5%
Tensile strength at break	> 60 N/mm

 **Directions for Use:**
For details, please refer to the safety data sheet.
